

Poste :	Spain & Latin America VET Market Manager
Ref code :	OLM095
Localisation :	Spain, Latin America
Durée	Permanent Position
<u>OLMIX:</u>	<p>A desire to provide natural alternatives to agricultural additives led to the creation of Olmix Group in Bréhan, at the heart of Brittany (France), in 1995. In 20 years, the company has become one of the major global specialists in marine biotechnology and green chemistry. From the start, Olmix Group has innovated in trace elements, transforming by-products into high-value ingredients. Its mission is to make effective use of an abundant untapped resource to promote sustainable food. This approach guides the company's teams worldwide in their work of extracting value from green, red and brown algae.</p> <p>Olmix, the Animal Care division of the group, places the animal at the interface of 2 major ecosystems: the external (housing, litter, air ...) and the internal (body, bacterial flora, nutrients, toxins ...). Both influence each other and their balance will determine animal performance. Olmix addresses these two ecosystems with a range of solutions specifically designed for the farmer, the veterinarian or the feed miller. Goal: to reach «antibiotic free» production while improving farmers profit and animal well-being, thanks to algae.</p> <p>Thanks To Algae, Olmix offers solutions which improve the hygiene of the animals by reducing the environmental humidity, enhance their immune defenses, guarantee the digestive welfare, increase the digestive efficiency and fight mycotoxins present in the feed. This global strategy contributes to reduce the use of antibiotics, to support the fight against antibiotic resistance and to improve the quality of the final product.</p>
